

Join us for a series of Digital Humanities talks and workshops

DIGI COLLOQUIUM

Matthew Somerville Morgan in Frank Leslie's Budget of Fun 181 (Apr. 1873), 8-9

Digital workflow, Machine Learning, and Getting to publication

Scott Reynolds Nelson will talk about using Word files and digital folders to manage document workflow for large research projects. Topics will include the flow-documents, place-keepers, and writing-diaries that help a writer maintain focus. He will also discuss using machine-learning tools to improve scholarly serendipity. Sites and applications discussed (but not endorsed) will include Finereaderonline, Tesseract, Zotero, Google Scholar, Amazon, Academia.edu, and Mendeley.

Nelson has written four prize-winning books including *Steel-Driving Man* and *Nation of Deadbeats*
